Massage

Relaxation Massage

Relaxation massage is extremely beneficial for people leading a busy lifestyle and who suffer from work related stress. Massage not only aids with mental relaxation but works on the physical symptoms of back and neck pain that come from sitting for extended periods at a desk or from physical labour. Relaxation massage also helps with insomnia and depression.

Therapeutic Massage

Stimulating the hormonal and nervous system, therapeutic massage relieves sore tense muscles, joints and sinews, enhancing mental alertness and improving your ability to focus on tasks. Therapeutic Massage calms the nervous system so you feel more relaxed, promotes regeneration of strength after work or after physical effort and eliminates tiredness – refreshing and relaxing your body to help you keep in good physical and mental condition.

Sports Therapy Massage

Sports massage therapy is proven to help ease the stress and tension which builds up in the body's soft tissue during physical activity. Sports massage can help prevent those niggling injuries that so often get in the way of performance and achievement.

Deep Tissue Massage

Deep tissue is a special form of massage using quite firm pressure to help deeply relax your body and prevent little injuries. Deep tissue massage is also recognised for helping with insomnia.

Hot Stone Massage

The use of hot stones for healing dates back to ancient time. It is a technique where heated smooth, flat stones are placed on key points on the body to warm and relax the muscles, allowing deeper pressure to be applied if desired. The warmth of the stones improves circulation, calms the nervous system and is both comforting and relaxing. Hot stone massage is used for back pain and aches, poor circulation, osteoarthritis and arthritis pain, stress, anxiety and tension, insomnia and depression. Experience the deep relaxation as the warm stones glide across your body in long flowing strokes.

Face Massage

Face massage is considered by many to be the most beneficial and has maximum relaxation effects, for the whole body. The face massage is lovely for women and also has incredibly relaxing affects for men.

Reflexology

A preventative maintenance massage that stimulates the reflex points on your feet and hands.

❖ *All massages include reflexology treatment*

Body Treatments

Cellu-Active Body Treatment

The anti-cellulite procedure consists of a special massage and body wrap to act on cellulite and refine the texture of the skin. A body wrap is applied with a gradual heating effect, where algae extracts and caffeine are combined to smooth “orange peel skin” and restore a shapely body.

Approximately 6-10 visits are recommended for best results.

Body Exfoliation Treatment

An energising and invigorating exfoliation based on salts from the Dead Sea, reputed for their rich mineral content, removing dead cells, and smoothing the skin even over the roughest areas! Your skin is soft and full of radiance and renewed life. This treatment includes a 20 minute back and foot relaxation massage.

Morpho-Body Stretch Mark Peeling

A very specific treatment that acts to reduce the appearance of existing stretch marks. It begins with the application of a highly concentrated peel to exfoliate, smooth, stimulate and prepare the skin for a reduction in stretch marks. Your skin is smoother and stretch marks fade away.

Nutri-Comfort Wrap

A highly nourishing body wrap used to rapidly restore utterly supple, soft and satiny smooth skin. With a cocktail of moisturising and nourishing active ingredients you re-establish the lipid balance and reinforce the natural barrier of the skin.

Relaxing Back Treatment

A 2-step treatment that begins with the application of a relaxing heated mask. This re-mineralising cataplasm based on algae and clay is used to eliminate toxins, reduce muscle tension and procure a pleasant feeling of relaxation. It is followed by relaxing manoeuvres to reduce muscle tension in the back. A complete treatment to combat the harmful affects of stress and tiredness.
